Position des Drehkreises bauseits festlegen. Wenn möglich mittig unter das Einlegeblech. Zwischen Drehkreis und Einlegeblech sollten 1-2 mm Luft sein.

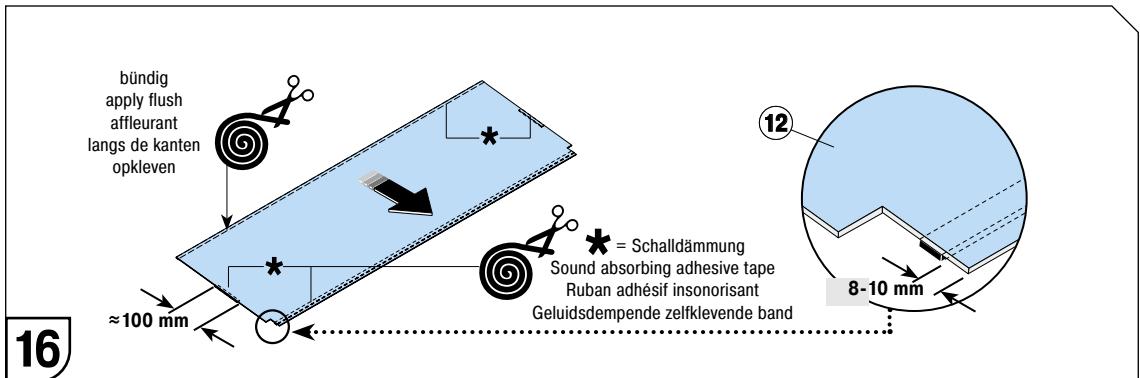

The position of the turnstile is to be determined by the operator. Ideally, it is placed centrally under the side edges of the picking tray. A distance of 1-2 mm between turnstile and picking tray is recommended.

Le positionnement du croisillon est à déterminer par l'opérateur. Idéalement le croisillon tient la tablette de prélevement en son milieu. Une distance de 1-2 mm entre croisillon et tablette est recommandée.

De positionering van het draaikruis wordt door de monteur bepaald. Indien mogelijk, draaikruis als middenondersteuning onder de zijkanten van de uitnamelegbord aanbrengen. Een afstand van 1-2 mm tussen draaikruis en uitnamelegbord is ideaal.
