Legal obligation and guarantee of product authenticity

Meeting the challenge of traceability

Since May 2019, tobacco products such as cigarettes and fine-cut tobacco must be made traceable throughout Europe. From May 2024, this will also apply to cigars and pipe tobacco. Retailers, manufacturers, kiosks and supermarkets are required to ensure digital traceability and tamper-proofing. These regulations protect the market, but they are also a challenge for companies – non-compliance can be expensive.

Better safe than sorry: Why end-to-end product traceability is crucial

A track and trace system is a vital tool that protects against illegal trade and counterfeit products by keeping the route of your tobacco products transparent. It avoids tax losses, protects your brand from reputational damage and ensures legal security. Without this system, there is a risk of high fines and long-term damage. Traceability therefore not only offers legal compliance, but also greater control and competitive advantages.

Get in touch with us

We are at your side as a reliable partner when it comes to designing and implementing customised solutions for ensuring reliable traceability of tobacco products. Together, we will shape a transparent and secure future in tobacco transportation.

More than just products – Our solution for transporting your tobacco products

To meet the strict requirements of tobacco transportation, BITO offers tailor-made solutions that meet the highest standards of safety, hygiene and efficiency.

Our innovative container range ensures optimum protection and reliable handling of your sensitive products – perfectly tailored to your individual needs.

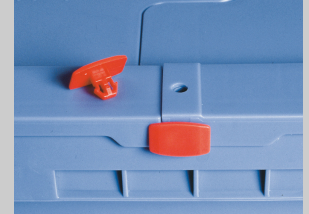

Internet of Bins (IOB) for tracking and tracing:

State-of-the-art technology enables the entire transportation route to be digitally monitored and the authenticity and integrity of the products to be guaranteed.

Customised logo printing and safety instructions:

Protect your brand with logos and safety instructions.

MB Multi-purpose containers can be sealed:

Tamper-proof containers protect your goods at every step.

Our MB container range includes:

Base dimensions LxW	Height (mm)	Volume (l)	Load capacity (kg)
300 x 200	153	5	15
400 x 300	173	16	14
	223	18	20
	273	22	25
	323	27	25
600 x 400	173	29	25
	223	38	30
	273	47	30
	323	58	35
	373	67	28
	423	74	35
800 x 400	323	76	35
	423	100	35
800 x 600	323	120	50
	423	158	50

Our MB container range is suited for many applications. The container sizes are compatible with each other and are suited for both small and large unit loads. Variants include models with a hinged two-part hinged lid, a strappable hinged lid, mounted swivelling stacking brackets, hinged stacking seats and versions with rubber or plastic swivel castors – ideal for flexible and efficient applications.

Your advantages

By complying with the latest EU regulations, you not only ensure the seamless transport of your products, but also offer your customers transparency and reliability. Your customers and partners benefit from the fact that your products are always authentic and legally compliant. Moreover, you act for the benefit of society by taking a stand against illegal trade.
