BITO Boltless shelving

Keeps your stockroom or office perfectly organised

BITO Shelving meets strict quality standards. It accommodates any kind of product. Shelving height and length can be adjusted to fit into any room. Assembly and reconfiguration can be done within a few minutes without tools, and later-on extension is just as easy. Shelving is applicable for unpalletised, light-weight items or unit loads requiring manual picking.

BITO Shelving in use at myTime.de

Product benefits in brief:

- ✓ Suited for storing any item or handy size unit load
- ✓ Utmost versatility
- ✓ Designed for easy self-assembly
- ✓ Easy to extend and to adjust
- ✓ Budget-friendly solution

BITO shelving provides unmatched versatility and maximum flexibility

- Suited for unpalletised unit loads and small parts filled into bins. Great for storage and order picking.
- The modular concept enables practically infinite arrangements and adapts to building requirements.
- Boltless shelving is easy to assemble, disassemble and reconfigure – and it is a very cost-efficient solution.
- Ideal for supplying workstations with parts and components and for use in order picking environments.

Shelving **type EL and L** for light-weight goods

Considering the actual weight of shelved goods, it often becomes apparent that many shelving installations are "oversized" as to their load capacity. BITO shelving type EL, which is built without beams and still has a load capacity of 100 kg per shelf, provides the optimal solution. Should your storage requirements change, it is no problem to upgrade shelving installations from type EL to L. Simply retrofit beams to increase the bay load capacity from 800 kg to 1,300 kg!

Boltless shelving **type M and S** for medium and heavy-weight goods

Shelving is expected to meet the most diverse needs. Bulky goods will need a wider level spacing than small size items. Or you may want to make full use of the available headroom in your premises and therefore opt for high-rise shelving. Other applications may need low-height shelving to allow handling without access equipment. We provide the right solution for every requirement. With the right accessories, configuration and design options are almost unlimited.

Mobile shelving

Boltless shelving on a wheeled base is perfect for order picking and for supplying workstations with parts and components.

Various shelf options cater for every need

Modularity enables a flexible approach

- ✓ A wide variety of parts and components provides many configuration options to suit any environment.
- ✓ Shelving installations can be extended with further bays and upgraded with accessories as required.
- ✓ A wide range of additional components caters for the most diverse needs in almost any industry.
- ✓ Shelving organises, stores and displays your goods in a neat and visually appealing way.
- ✓ BITO plastic bins and containers are a perfect match for BITO boltless shelving.

of applications**

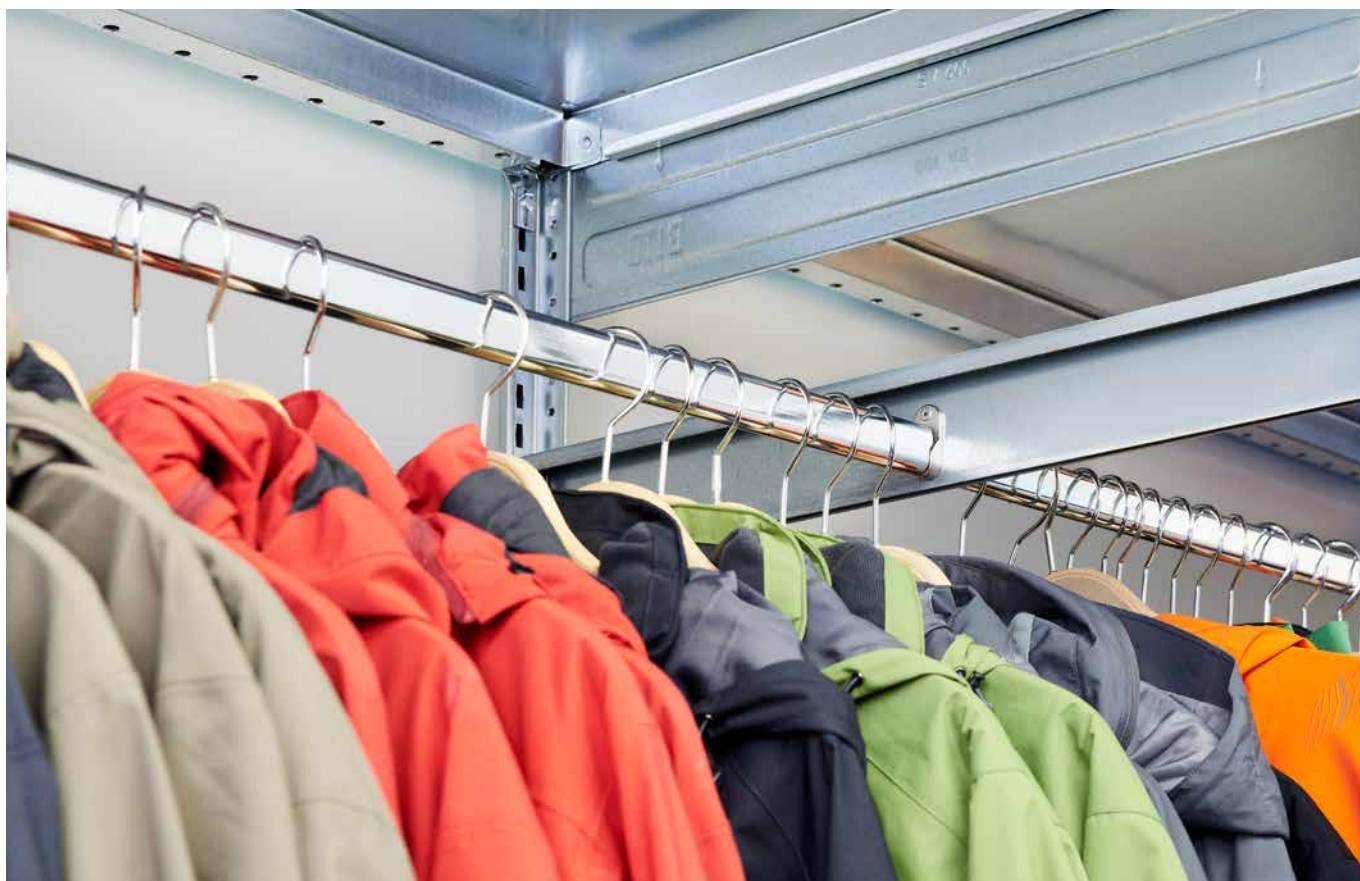

Shelving enables easy-to-view product storage and makes best use of the available space in your premises

About the customer:

For 37 years, the German outdoor clothing and equipment specialist Globetrotter Ausrüstung GmbH have been convincing customers with carefully selected travel and outdoor equipment and have meanwhile grown into one of Europe's largest retailers of outdoor products. 1,300 employees from 60 nations work in 13 Globetrotter stores and in dispatch logistics. They all share their enthusiasm for travelling and far away countries – a unique, valuable asset that sets Globetrotter apart from other outdoor retailers.

Customer requirements:

- Showrooms, shop stockrooms as well as warehouses at the subsidiaries had to be furnished with high quality shelving.
- Optimum use must be made of the available space in showrooms, stockrooms and warehouses.
- No sharp edges in order to avoid injuries and product damage during order picking.
- Shelving must be easy to assemble and allow for flexible shelf level spacing.
