LEO »custom«

LEO custom is the basic unit for all on-top structures that can be perfectly adapted to your individual requirements.

- + Load capacity up to 55 kg
- + Maximum speed 0.7 m/s
- + Travel performance 48 km/day
- + Automatic charging
- + Ready for immediate start-up
- + ROI < 1 year on average
- + No IT interface or WLAN necessary
- + Pre-drilled mounting plate for customised on-top structures

The standardised hardware interface connects to

- electronic devices
- control panels
- additional sensors

LEO »locative«

With LEO custom as basic unit, LEO locative is the ideal solution for transporting bins and cardboard boxes around your premises. LEO autonomously delivers goods to its destination.

By simply passing through patented transfer stations, LEO locative picks up or drops off bins or cartons without any delay.

- + Suited for bins sized up to 400 x 600 mm
- + Load capacity 35 kg
- + Single and twin stations
- + Powered rollers form an interface to conveyor systems
- + Buffer lanes can be used for intermediate storage

LEO »flow«

LEO flow is the space-saving, driverless solution for supporting logistics in production environments.

With LEO custom as basic unit, LEO flow features powered rollers.

- + Load capacity up to 35 kg
- + Suited for bins sized up to 800 x 600 mm
- + Ideal for use on conveyors
- + Automatic lifting function available as optional feature
- + Particularly space-saving solution

Navigation & Control

Track guidance

The LEO AGV family uses vision-based navigation. The transporters are equipped with a camera sensor that recognises the travel tracks marked on the floor.

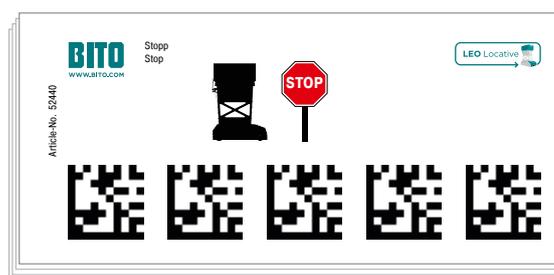

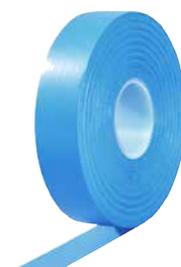

Markers

BITO LEO markers communicate directions and other commands to the LEO vehicles, thereby serving as "traffic & road signs". The markers are simply pasted alongside the travel track.

Smartbox

The Smartbox is a decentralised control unit especially designed for the LEO system. It transmits driving commands to the LEO vehicles and is able to manage traffic at intersections.

In addition, external systems such as a **warehouse management system** can be integrated using Smartbox technology.
