BITO
LAGERTECHNIK

BITO WMS

BITO WMS is the cloud-based warehouse management system solution for your logistics.

Digitize your warehouse processes and increase your productivity. Take advantage of the benefits of BITO WMS!

- ✓ ROI in less than 12 months
- ✓ Up to 25% increase in performance
- ✓ Implementation time less than 1 month

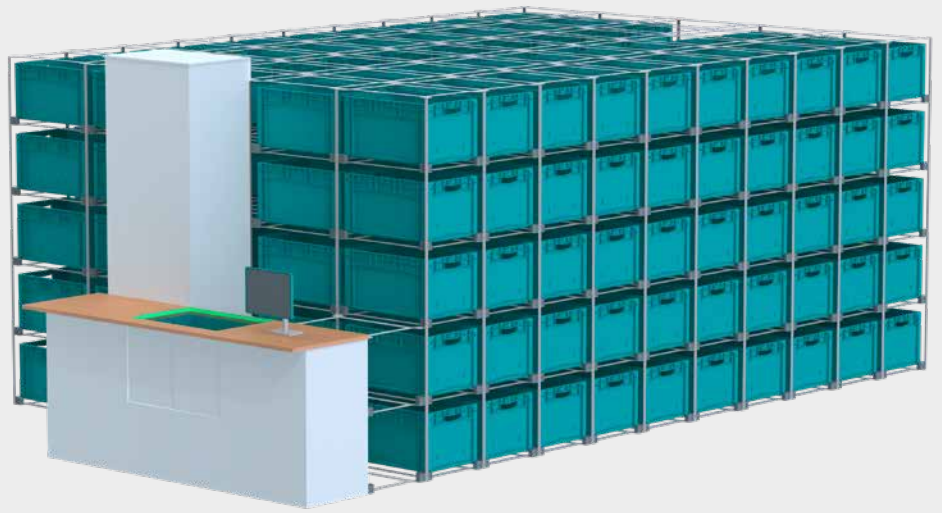

BITO LEO Transporter

BITO LEO Transporter - the simplest driverless transport system on the market.

The transporters are ideal for connecting workstations in both logistics and production areas.

- ✓ ROI within the first 12 months
- ✓ Easily scalable and can be implemented for less than €20,000
- ✓ Flexible and customizable without an IT connection

CELLGO Automatic storage system

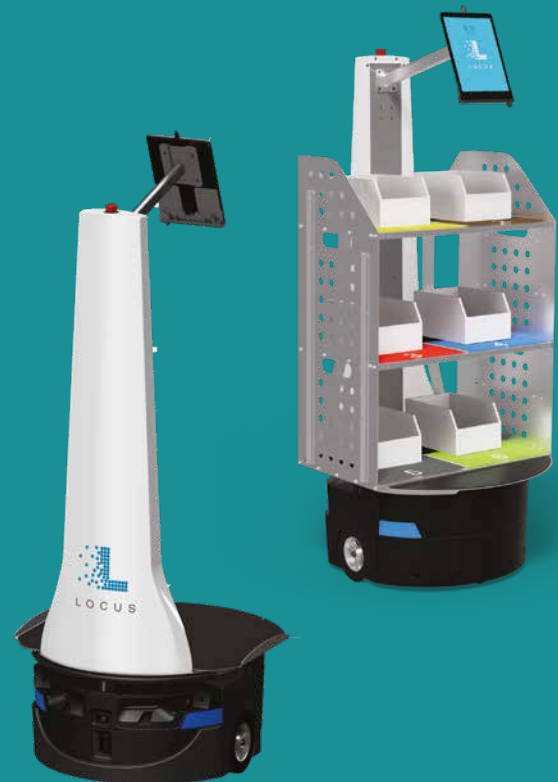

Discover the **Cellgo storage system**, the automated bin storage solution for medium-sized businesses. Scalable from 250 to up to 10,000 bins.

- ✓ Potential for up to 70% compression of storage space
- ✓ Performance increase of up to 60% possible
- ✓ Modular and flexible, adaptable to existing infrastructure.

LOCUS Order picking robots

Automate your logistics with Locus, the flexible collaborative robotics solution (multi-bots) for efficient use, especially in your order picking.

- ✓ Increased productivity by a factor of 2-3
- ✓ Savings in employee resources of up to 50%
- ✓ Integration into existing systems in just a few weeks and without interrupting operations

Digitization of bins and shelves

The **Internet of Bins IOB®** enables containers to be digitalized.

By using the bins and using digital components, data can be generated, processes can be managed digitally, and inventories can be tracked and analyzed.

In particular, the following four use cases are covered:

- ✓ Pick by Light / Pick by Voice support
- ✓ Digital material monitoring / Material supply (eKanban)
- ✓ Dynamic inventory display and booking in the flow racking
- ✓ Real-time and location-dependent tracking of bins

WE TAKE THE TIME
TO GIVE ADVICE.
